PROFESSIONAL SUMMARY

Results-driven Full Stack Software Developer and 2025 MCA graduate with hands-on experience designing, developing, and deploying enterprise web applications using Python, Django, REST APIs, MySQL, and modern JavaScript. Demonstrated track record at Tisser Technologies LLP delivering production-ready applications, including a Healthcare HMS and an Enterprise CRM. Skilled in architecting Role-Based Access Control (RBAC), optimizing complex SQL queries for 35% faster response times, and integrating AI microservices via OpenAI API. Proficient across the full Software Development Life Cycle (SDLC) with strong command of Git workflows, Agile methodologies, and object-oriented backend architecture.

TECHNICAL SKILLS

Full Stack Backend:	Python, Django, Django REST Framework (DRF), RESTful API Design, Microservices, Core Java, Object-Oriented Programming (OOP), RBAC, Middleware
Frontend & UI/UX:	JavaScript (ES6+), React.js (Basics), HTML5, CSS3, Bootstrap 5, Tailwind CSS, AJAX, JSON, DOM Manipulation, Responsive Web Design
Databases & Storage:	MySQL, PostgreSQL, SQL Query Optimization, Django ORM, Relational Database Schema Design, Database Indexing, Data Normalization
Developer Tools & DevOps:	Git, GitHub, Postman API Client, VS Code, Agile/Scrum Methodologies, CI/CD Pipelines, Linux/Unix Commands, Software Testing
APIs & Cloud Integrations:	OpenAI API Integration, Webhooks, Third-Party REST Services, JSON Web Tokens (JWT), Session Management
Languages Spoken:	English (Professional), Malayalam (Native), Hindi (Conversational)

PROFESSIONAL EXPERIENCE

Junior Software Developer — **Oct 2025 – Present**

Tisser Technologies LLP — *Kottayam, Kerala*

- Architected and deployed 15+ full-stack functional modules for an enterprise Physiotherapy Clinic HMS, automating patient onboarding, real-time appointment scheduling, electronic treatment records, and invoice generation.
- Engineered a multi-tenant CRM application managing 1,000+ client lead records, pipeline progression tracking, and automated email follow-up schedules using Django, MySQL, and Bootstrap 5.
- Spearheaded the design of 20+ secure RESTful API endpoints utilizing Django REST Framework (DRF) with fine-grained Role-Based Access Control (RBAC) across Admin, Doctor, Manager, and Receptionist user roles.
- Refactored legacy ORM database queries and implemented strategic SQL indexing in MySQL, reducing API latency by 35% and enhancing real-time reporting speeds across administrative dashboards.
- Executed peer code reviews, enforced PEP 8 coding standards, and maintained clean Git commit trees across multi-developer Agile production sprints.

Django Developer Intern — **Jan 2025 – Apr 2025**

Tisser Technologies LLP — *Kottayam, Kerala*

- Developed full-stack web features using Python, Django, HTML5, CSS3, JavaScript, and Bootstrap 5, contributing to 4 core client projects on schedule.
- Constructed and validated 12+ REST API endpoints using Django REST Framework and Postman, achieving 100% data validation pass rates prior to production rollout.
- Resolved 25+ frontend layout and backend logic bugs through rigorous unit testing and cross-browser debugging.

Java Developer Intern — **Jun 2024 – Jul 2024**

CODTECH IT Solutions — *Remote*

- Programmed modular backend components in Core Java leveraging OOP principles (Inheritance, Polymorphism, Encapsulation) to solve complex algorithmic logic problems.

- Authoring technical documentation and unit tests for Java applications, ensuring high software maintainability.

PROJECTS

Job AI – Automated AI-Powered Job Portal & ATS Evaluator *Django, OpenAI API, REST API, Bootstrap 5 (2025)*

- Built an end-to-end full-stack recruitment portal featuring automated resume parsing and intelligent ATS keyword-matching algorithms to rank candidates automatically.
- Integrated OpenAI API models to generate real-time dynamic interview questions, automated candidate feedback summaries, and candidate match scores.
- Designed an interactive, responsive front-end dashboard in Bootstrap 5 and JavaScript, supporting dual workflows for job seekers and enterprise recruiters.

DIRT SWEEPER – Autonomous Obstacle Avoidance Cleaner *Arduino Uno, Embedded C/C++, Ultrasonic Sensors (2023–2024)*

- Programmed an Arduino Uno micro-controller with ultrasonic sensor logic to achieve 98% accuracy in real-time obstacle detection and autonomous path navigation.

Raspberry Pi Object Detection Smart Vehicle *Python, Raspberry Pi, OpenCV Basics, L298N Motor Driver (2022–2023)*

- Designed and configured a Python-based computer vision car using Raspberry Pi, Pi Camera, and L298N driver for real-time video stream processing and obstacle avoidance.

EDUCATION

Master of Computer Applications - Integrated (MCA) **2020 – 2025**
Saintgits College of Engineering (Autonomous), Kottayam | APJ Abdul Kalam Technological University CGPA: 8.61 / 10

Senior Secondary Education (Class XII) **2018 – 2020**
Aravinda Vidya Mandiram, Pallickathodu, Kottayam | CBSE *Percentage: 81.2%*

Secondary School Education (Class X) **2017 – 2018**
Aravinda Vidya Mandiram, Pallickathodu, Kottayam | CBSE *Percentage: 86.0%*

CERTIFICATIONS & WORKSHOPS

- **Certifications:** Databases and SQL for Data Science (IBM, Coursera) • Basics of Python (Infosys Springboard) • Problem Solving Using Computational Thinking (University of Michigan) • Front-End Development - HTML & CSS (Great Learning) • HTML Essential Training (LinkedIn Learning).
- **Workshops & Fests:** FOSS Tech Venture (ICFOSS) • SRISHTI 2024 National Tech Fest • Mobile Game Development Workshop • Web Development Bootcamp (TinkerHub).
